1. Highlights, Karl-Henrik Robert DVD

This 'Highlights' DVD is a collection of Dr. Karl-Henrik Robert's best moments as he addressed the 2006 Swedish Tour of EkoMunicipalities participants on June 3rd in Stockholm, Sweden. I choose these segments as some of the best teaching moments from DR. Robert's lecture and Q&A session.

This DVD is designed to help you access Karl's best teaching moments, by using the index on the opening screen after you insert your DVD into your DVD player. Just click the segment that interests you and your DVD player will take you to that point on the DVD.

I am constructing what I call 'Learning Kernels', short video segments that contain a clip of Dr. Robert, short .ppt builds to help explain and visualize Karl's point and then several Socratic questions to help internalize the point and tie into each learner's individual circumstance. These Learning Kernels are short enough to put up on YouTube, for public access or to use in study circle or presentations in your community. These learning kernels are not yet completed. DVD length: 29:44
